OUR WORLD IS CHANGING...SHOULDN'T YOU?

Advanced Project Management

About this programme:

There is a project management knowledge gap existing among those responsible for managing projects within different industries. This programme has been designed to provide delegates with sufficient contemporary project management skills in order to allow them to be efficient in managing resources and time when working on projects.

This programme is expected to turn current 'Accidental Project Managers' into knowledgeable and consequently skilled Project Managers.

This programme is a core offering for business across key sectors of the economy, and is important for managers in developing skills to effectively manage projects within an organisation.

How you will benefit. You will learn to:

- Understand the project management environment and its setting
- Understand the complexity of projects irrespective of size
- Understand the project anatomy/project life cycle and project parameters (cost, quality, schedule, stakeholders management, health and safety, environment)
- Understand project management nomenclature and basic definitions
- Understand the fundamentals of creating value in the project management process
- Understand the process of carrying out a feasibility study and the importance of a feasibility study
- Understand the project scoping process and development of a Work Breakdown Structure (WBS) and how the WBS relates to project budgeting and the formulation of a schedule of activities - managing and control
- Understand how to manage project risk and project contracts/service level agreements
- Understand how to prepare a cost estimate of a project and manage project costs
- Understand how to select an appropriate project procurement system
- Understand how to prepare a project schedule and manage it
- Understand how to optimise project resources
- Understand how to learn from a project

Key focus areas:

- Project Environment and its Dynamics
- Project Planning and Control
- Project Scheduling and Control
- Managing Project Cost and Control
- Project Risk Management, Procurement and Contracts
- Managing Project Human Resources and Learning from Projects

Who should attend:

This programme is aimed at corporate and public sector clients who will be considering or would be involved in managing projects in the future

Facilitators include:

Mondli Mbambo

Mondli is a passionate project management professional and practitioner. He is a Project Manager by choice, not by chance. He has worked with various consulting firms as their Project Management Specialist and has been facilitating Project Management lectures for the past 11 years. He sees

lecturing as the strategic platform to share real life case studies on various projects that he has worked with. Mondli is a member of the Project Management Institute (PMI) and serves as the President of Project Management South Africa (KwaZulu-Natal region).

Professor Pantaleo MD Rwelamila

Professor Rwelamila researches and teaches project management and is based at UNISA's School of Business Leadership. His areas of specialisation include project management, project delivery systems, and influence of culture on project management. His research interests are appropriate project delivery systems, best practices in construction

for industry development, public private partnerships (PPPs) in infrastructure development, construction industry policy, culture in organisations, TQM and project dispute resolution methods. In 2005, Prof Rwelamila was the second most cited academic in the research area of project management in the world. He holds PhD (Project Management), UCT MSc (Construction on Project Management), Brunel University APD (B.Economics) ARI-UCLAS qualifications.
